

AVENTO DAY-FLEX

Combinination of a hospital bed and a relax chair

A revolutionary compact chair with a range of functions thanks to an E-lift function, a horizontal examination position, and a Trendelenburg position.

This makes the Avento Day-Flex a versatile chair for multiple applications: it is ideal for day hospitals and examination rooms.

In addition to the separate adjustment of height, incline, backrest, seat, and legrest, the chair can be quickly and easily put into several pre-programmed positions.

Furthermore, a personal preference position can be saved for quick reactivation later.

Product Code	BE2034
Weight Limit	31 stone / 200 kg
Height Adjustment	Electric
Width	710mm
Seat Width	530mm
Height	1280mm - 1580mm
Seat Height	500mm - 800mm
Depth	840mm - 1820mm
Seat Depth	520mm
Armrest Width	72mm - 50mm

Horizontal examination position

Put the chair without any effort into a horizontal position to perform patient examinations easily.

E-lift function

Makes it easier to sit down or get up and increases the patient's self reliance.

Trendelenburg function

Use the Trendelenburg position for quick and crucial medical interventions that are essential for the patient's safety.

Integrated safety functions

The Avento Day-Flex standard is equipped with a brake buzzer that emits a clear signal when the chair brakes are not activated and the power cable is still plugged in.

Moreover, the chair can only be operated when the central brake is activated. This prevents unsafe situations, especially during the E-lift movement. The central brake is activated effortlessly by means of side pedals that are equipped with a soft brake system.

Intuitive software prevents non-ergonomic positions during its use.
