

SEATTLE - Reclining Wooden Relax Chair

Complementing the core values of the Carson, the Seattle offers a modern sculptured wooden frame embodying the essence of calm. The Seattle supports clean Scandinavian design concepts with its welcoming aesthetics and wood colour choices. Available in models with a leg rest, the recline mechanism raises the user's legs first with option of then reclining back, with a gentle push, the chair can easily be repositioned back without the use of a lever. Models with no leg rest have side handles to securely lock the recline into position.
