

TULSA - Soft Seating

With the growth in open and breakout areas within hospital environments and the lean towards contemporary seating styles, the Tulsa with its variable back height provides a relaxed and collective seating solution. Designed to have less of a clinical feel and more of a comfort style, creating a certain sense of warmth, the Tulsa is a chair which makes you feel like you're in a space which is a home away from home. Available in a range of armchairs with a matching two seater sofa.

Key facts:

- Antimicrobial vinyl which protects against germs, abrasion and staining
- Two-tone vinyl colour is optional - costs 10% extra
