Clini-Cart® Polymer Trolley

The Clini-Cart® polymer procedure and emergency resus trolley takes infection prevention and control to a whole new level. It's patented construction from 100% antimicrobial polymer means it represents the cutting edge of medical cart design.

CCP1168BCL101 Clini-Cart Polymer Procedure Trolley 46" high

CCP1041RSL101 Clini-Cart Polymer Emergency Trolley 41" high

Key Features

Choose the Clini-Cart® polymer procedure trolley if you desire the highest levels of IPC for your healthcare facility. Its lightweight yet strong polymer construction means by choosing Clini-Cart® polymer you are choosing to care for your medical staff. Less weight equals fewer musculoskeletal issues, and 100% antimicrobial surfaces avoids your workers being harmed by avoidable infections. A comprehensive range of accessories is available to customise your trolley to the specific needs of your teams. Complete with a pop-out additional work surface. Choose the Clini-Cart® polymer emergency resus trolley if you desire the highest levels of IPC for your healthcare facility. The specially designed breakaway numbered seal locking system removes the need for traditional locking bars to secure the drawers, meaning less dirt traps that could harbour bacteria. A comprehensive range of accessories is available to customise your trolley to the specific needs of your resus team. Complete with a pop-out additional work surface to support your team

Both versions are supplied on 125mm castors, two of which are braked and one is directional for easier movement.

- Integral bumper to protect your facility and the cart
- Lightweight but strong
- 100% antimicrobial polymer
- Dividers not included
- Attractive blue and light grey colourway
- Very resistant to hospital cleaning products
- Choice of 5 or 6 easy to remove ISO drawers for cleaning & restocking
- Two height options 41" or 46" to suit your needs
- Keylock or codelock alternative locking systems
- Patented design
