Denver & Toronto Reclining Armchairs

"We've had so many compliments on how comfortable they are which matters when patients are seated for long periods of time"

View a video of the Denver Electric Recliner in action

Key Features

The needs of both the patient and the clinician are incorporated into the Denver design. Ergonomically designed with a contoured back, the seat cushion works constantly to distribute the users weight, reducing pressure points on the body.

Every furniture brief has a purpose for us; when it came to the Toronto armchair, the Ocura team knew there was a need for a reclining chair that could shift seamlessly into the Trendelenburg position in the event of an emergency, whilst incorporating classic ergonomics to offer optimal patient comfort.

- Easy to clean antimicrobial vinyl to aid infection control
- 25 stone/160kg
