

curaCARE® CA4861

curaCARE Easy Clean Overchair Table

Table

Every design brief has a purpose for us, when we started the process our goal was to create the best value Over Chair Table. The range is an essential part of patient care, and so our driver was to create a robust and durable product that was designed especially for demanding healthcare environments. The design ensured a product that is 'one wipe' clean' to aid infection control, the 50mm castors allow the table to be easily moved. The table is height-adjustable which allows the patient to choose the height to suit their needs.
