

# Fero Reclining Relax Chair

**“Staff, patients and partners loved the chairs and they made a real difference to their experience”**

## Key Features

The Fero excels in how it enables patients, clinicians, and visitors the flexibility of use. The compact footprint of the chair makes it ideal for bedside spaces that are often short on space. Fero is suited to a wide range of healthcare environments and is particularly loved by maternity and neonatal units due to the chair's support for kangaroo care.

Available in both manual recline, which is a combined leg and back action, and electric recline, which offers a choice of separate leg and back or combined adjustment.

- Side handles can easily lock the chair at any stage whilst in the recline position
- The mechanism allows the backrest, seat, and legrest to simultaneously tilt into a 'zero gravity' position providing good blood circulation
- The curved armrests act as an aid for entering and exiting the chair
- Easy to clean with a simple lift-out seat and antimicrobial vinyl to aid infection control
-  21 stone/135kg
