

Ferrara Treatment Chair

“Our new Ocura Ferrara chairs can be raised to the perfect height for treatments which helps staff be more efficient and improves the patient experience.”

Key Features

Our Ferrara chair is a compact treatment chair suitable for a wide range of treatments. It is available with upholstered cannulation type armrests or standard armrests, and can be easily placed in a comfort reclined position, or a flat “bed” position, making it a versatile therapy chair; it can also be put into an emergency “Trendelenburg” position quickly. With a seat width of 600mm and the perpendicular angle of the leg section, it can be used as a chair or couch. It is available with or without height adjustment and offers a wide range of accessories to make the Ferrara a next-generation chair.

- Easy to clean antimicrobial vinyl to aid infection control
- The vertical legrest enables the chair to be used in spaces that would be too small for a full length couch
- Innovative armrest technology with individual positioning
- Easy side access
- 100mm twin wheel castors
-  34.6 stone/220kg
