

Modena Surgery Treatment Chair

The Modena chair has been introduced to meet the demand for a mobile treatment chair which can be used where traditionally a trolley would be required.

Key Features

Modena's design saves vitally needed space in a busy hospital environment. It is ideal for minor day procedures, preparation for and transport to and from surgery, and for recovery after anaesthesia. It is powered by high performance motors and can operate from mains or from its integral chargeable battery. A wide range of options exist which can enable the chair to be adapted to different applications.

- Antimicrobial vinyl to aid infection control
- Easy to operate drop down armrests act as cotsides when the patient is lying down
- Electric motor adjustment of backrest, seat and leg section as well as height
- Emergency foot switch for Trendelenburg position, ensuring staff keep their hands free
- Easy side access
- 125mm castors for comfortable transporting, central braking system
-  34.6 stone/220kg
