

Restora Reclining Armchair

Supportive and comfortable

Our range of Restora reclining chairs has been curated to suit a wide range of needs within healthcare environments.

Compatible with many commonly used items such as standing aids and hoists, our new Restora recliners are a great choice for many departments in healthcare.

The grey vinyl is Vapour Permeable meaning it is breathable whilst preventing condensation and reducing sweat. All recliners are suitable for patients at medium risk of developing pressure sores.
