

## DELUXE OVERBED TABLE

The epitome of functionality, stability and quality, our Deluxe overbed tables and overchair table have been meticulously designed to ensure they meet the most stringent patient and medical staff requirements. The durable, quality frame is combined with smooth-running castors to ensure the table is easy to move while still safely holding loads of up to 30kg. Powerful pneumatic springs make it easy to gently adjust the height of the tray with one hand and provides added safety if the patient is in the emergency Trendelenburg position. The removable trays have recessed grips and are the perfect size for holding meal trays, patient items, clinical accessories and disinfectants. The tough, resistant surface is quick and easy to clean. Also available with an adjustable rotating tabletop.
